# Disclaimer

The Densify Product Support Policy is provided for information purposes only to help customers understand how Densify prioritizes and delivers releases throughout the lifecycle of a Densify product and products with which Densify integrates.

The Densify Product Support Policy outlines policies relating to customer support of Densify and supported integration with third-party platforms. Densify reserves the right to modify or change all or portions of this policy at any time without notice.

The Densify Product Support Policy does not constitute a contract, does not modify the terms of any existing customer contract, and does not provide any warranties or guarantee of performance against any outlined time lines.

# Densify Product Support Policy

This document outlines Densify's product support lifecycle policies for SaaS-based users. These policies are guidelines that Densify uses to guide efforts for support of currently released Densify products as well as the products that integrate with Densify's products.

## Support for Released Densify Products

Densify provides comprehensive support for all customers on active support contracts. This policy defines the level of support offered for the version of Densify in the current SaaS deployment.

## Densify Product Version Numbers

Densify product version numbers are split into 4 components:

- Major version
- Minor version
- Maintenance version
- Build number

You can find the version of your Densify product by clicking the Profile and Settings icon () in the Densify Console. You may also see a build number. i.e. 2.4.0 1029

On new releases of major or minor versions, the maintenance version will be omitted, and you can assume this value is 0. Unless indicated otherwise, the build number will be 100 and will also be omitted from general communications.

## Release Categories

Densify delivers 2 types of releases:

- Feature Releases—These often contain significant changes to existing features and the addition of new features to the Densify product.
- Maintenance Releases—These contain fixes or feature updates that have been identified by customers and partners during deployment. Changes in a maintenance release are generally smaller in scope.

## Identifying the Release Category

You can identify the release category by looking at the major, minor, maintenance, or build number. These numbers are incremented to define the release category:

- Feature release—Major or minor version number is incremented. i.e. 1.0.0 goes to 2.0.0
- Minor/Maintenance release—Minor version and build number are incremented. i.e. 2.0.0 goes to 2.1.0.
- Hot Fixes—Maintenance version and build number are incremented. i.e. 2.0.0 goes to 2.0.1.

## Product Support

Product support is composed of:

- Customer Support Line—The customer can contact Densify customer support for help with resolution of issues.
- Densify Engineering—Densify support, on behalf of the customer, can escalate critical or high priority issues to Densify engineering for further assistance in finding and resolving the issue through configuration changes and workarounds.
- Patch Escalation—After investigation by Densify engineering, if a critical or high priority issue is identified as a product defect and no viable workaround is available then Densify support, on behalf of the customer, can request that a fix be made available as part of the next release. In special circumstances, customer patches may be created outside of the maintenance release schedule.

## Densify Versions

Table - Certified Densify Versions

Tier	Densify Versions
1	Densify 2.4

## End of Support Notice

There are currently no End of Support notifications for Densify.

## Client Browsers

The following browsers have been certified for each console:

### Table-Densify Certified Browsers

Analysis Console	Microsoft Edge™ in Internet Explorer mode.
Densify Console	Google Chrome™ 117.0.5938.92 or later Microsoft Edge™ 117.0.2045.43 or later

## End of Support Notice

There are currently no End of Support notifications for supported browsers.

## Policy to Update Support for Browser Versions

The following policy outlines how Densify schedules and delivers support for new releases of browsers.

### *Scheduling*

Support for new, major release of a browser will be provided at Densify's discretion, based on market needs.

### *Delivery*

Support will be delivered in a current or future Release Category.

## Data Collection

The platforms that are certified and supported for data collection are tiered with higher-tier systems having higher priority and more certified capabilities as compared to the lower tiers. The following table describes each tier for Densify data collection.

## Data Collection Platforms

Table-Certified Data Collection Platforms

Tier	Public Cloud
1	<ul style="list-style-type: none"> <li>■ Amazon Web Services</li> <li>■ Microsoft Azure</li> <li>■ Google Cloud Platform</li> </ul>
Tier	Container
1	<ul style="list-style-type: none"> <li>■ CNCF Kubernetes (<a href="https://kubernetes.io/releases/">https://kubernetes.io/releases/</a>)</li> <li>■ OpenShift Containers Platform (<a href="https://docs.aws.amazon.com/eks/latest/userguide/kubernetes-versions.html">https://docs.aws.amazon.com/eks/latest/userguide/kubernetes-versions.html</a>)</li> <li>■ Amazon EKS (<a href="https://docs.aws.amazon.com/eks/latest/userguide/kubernetes-versions.html">https://docs.aws.amazon.com/eks/latest/userguide/kubernetes-versions.html</a>)</li> <li>■ Azure Kubernetes Service (AKS) (<a href="https://docs.microsoft.com/en-us/azure/aks/supported-kubernetes-versions">https://docs.microsoft.com/en-us/azure/aks/supported-kubernetes-versions</a>)</li> <li>■ Google Kubernetes Engine (GKE) (<a href="https://cloud.google.com/kubernetes-engine/docs/release-schedule">https://cloud.google.com/kubernetes-engine/docs/release-schedule</a>)</li> </ul>
Tier	Container
3	<ul style="list-style-type: none"> <li>■ Other Kubernetes conformant platforms and older/non-current versions of the above</li> </ul>

## Densify Container Optimization Data Forwarder

Container data is collected using the Container Optimization Data Forwarder. See <https://github.com/densify-dev/Container-Optimization-Data-Forwarder>.

Table-Certified Version of the Densify Container Optimization Data Forwarder

Software	Certified Version
Densify Container Optimization Data Forwarder	4.0.0

Forwarder change log: <https://github.com/densify-dev/Container-Optimization-Data-Forwarder/blob/master/CHANGELOG.md>

## End of Support Notice

Densify will discontinue support for the following after the listed "Expected End of Support" date.

**Note:** For existing customers, the expected end of support date is determined in each of your individual customer contracts.

Densify intends to discontinue support for the following after the listed "Expected End of Support" date.

Table-End of Support for Data Collection Platforms

Tier	Data Collection Platforms	Expected End of Support Date
1	Densify Container Data Forwarder 3.x.x.	June 30, 2024
1	Densify Container Data Forwarder 1.x.x and 2.x.x.	December 31, 2023

## Policy to Update Support for Data Collection Platforms

The following policy outlines how Densify schedules and delivers support for a new release of systems that are supported for data collection.

**Note:** Support for a new release is at the discretion of Densify and may be based on market and/or customer demand and affect delivery commitments as stated below.

### Scheduling

- Support for a new Tier 1 release within 120 days of General Availability of that release.
- Support for a new Tier 2 release within 180 days of General Availability of that release.
- Support for a new Tier 3 release will be at the discretion of Densify and based on market and customer demand.

### Delivery

Support will be delivered in a future Release Category.
